

Coronavirus (COVID-19) update

Our office is currently closed other than emergency services in an effort to protect our patients, staff, and community in light of the current coronavirus pandemic. This closure is in line with the recommendations and regulations from the state and national dental associations, governmental, and other health agencies. We are keeping a close watch on developments and changes as they occur so that we are able to open to more services as soon as possible. We are deeply sorry for the impact that this has on our patients and their families and hope to be able to see you all again soon. We will continue to check messages and emails and work to ensure communications with our Coastal Pediatric Dentistry family can continue despite the physical closure of the office. If you have a dental emergency please do not hesitate to contact us. Stay safe and healthy out there and we will get through this current challenge together.
